

Newline HD12 Easy Find Receiver Quick Start Guide

1. Connect the remote infra red eye to the receiver.
2. Connect the power to the receiver.
3. Connect the cable from the LNB to the "LNB IN" on the receiver.
4. Connect the HDMI or composite output to your TV.
5. Make sure your TV is on the correct input and turn the receiver on with its remote control. The red LED in the remote infra red eye should turn green and you will see the Newline boot up screen on your TV.
6. Once you are seeing the "No Signal" screen from the receiver press the **Info** button on the remote once or twice until you see the screen below:

Note: Where it shows the red box with "Easy Find On" this means EasyFind is turned off and it is telling you to press the red button on the remote to turn Easy Find on.

7. Press the red button on the remote and this will change to say "Easy Find Off" and the LED on the LNB will start to flash.
8. You can now adjust the dish rotation until it changes to amber then green.
