# Lets get started

Press the button on top of the unit for a couple of seconds to switch it on. The unit will automatically start up your navigation.

You will see a screen confirming the vehicle and sizes. (This is a default screen and will change after you have set your vehicle profile up)

Press **DONE** and then you can start the process of personalising your Sat Nav.

## What do I do if my unit says “Please set Navigation Path”?

Press the OK button on the message until it disappears from the screen.

Press the **NAVI PATH** icon

Press the small box on the right that show three lines and three dots

you will see a file named **SDMMC** press on this and then you will see **NAVI.EXE**

Press **NAVI.EXE** until it is ticked and press **OK**. Go back to the first screen and press the **Navigation** icon.

## **Setting up your vehicle dimensions**

**NB:** The default size setting is in feet if you wish to enter your details in metres then you will need to follow this steps below first

On the main screen select **MORE** Then **SETTINGS** and scroll down to

### **REGIONAL - UNITS AND FORMATS - DISTANCE**

When pressing **DISTANCE** it allows you to switch between meters and feet. Make you selection and continue.

On the main screen select **MORE - SETTINGS** and scroll down to **ROUTE SETTINGS**

The vehicle field at the top will tell you which type of vehicle it is currently set to use, eg. Motorhome, Car and Caravan, or Car

### **Tap the vehicle field button**

You will see a list of vehicles you can choose from

To change the settings for any of the vehicles select the tools icon (spanner and screwdriver) next to the relevant entry, you can then enter your vehicle dimensions, lenth, weight, etc. and tick if you are towing.

When the details have been entered then make sure the **black spot** is selected next to the relevant vehicle

## **How to Find an address by Postcode or Town and Street Name**

On the main screen press

**FIND - FIND ADDRESS - TOWN**

You now have an option to enter a  
**TOWN** or **POSTCODE**

When entering a Postcode you must enter the  
**space**

for example: **WA4 4LE**

or just enter a town and street name

Press **RESULTS** then Press **SELECT TOWN**

You will now see your destination on a map

You can move the cursor around on the map  
Allowing you to pinpoint a specific area

When you are happy with the details entered

Press **NEXT - NEW ROUTE - GO**

The sat nav's preferred route for your vehicle will  
now be displayed, at this point you can look for

**ROUTE ALTERNATIVES**

Press **MORE - ROUTE ALTERNATIVES**

## **How to find your Campsites and Points of Interest**

On the main screen press

### **FIND - FIND PLACES - CUSTOM SEARCH**

Select one of the four options presented

This allows you to search the information in your  
chosen area

All your information will be shown in separate  
categories

Press on the file you require eg. Aires, Campsites,  
LPG etc.

Now press the selected entry that you want to travel  
to

Press **NEXT - NEW ROUTE - GO**

### **Alternatively**

If you know the name of the place you want to  
find then use **FIND BY NAME** in the bottom right  
hand corner.

Type in the name and you will see RESULTS in the  
bottom right. When you have selected the place  
you want to visit

Press **NEXT - NEW ROUTE - GO**

## How to enter Co-ordinates

On the main screen press

**FIND - MORE**

You will find this at the centre bottom of the screen

Enter your longitude and latitude

There are three options

Press - **MORE - UNITS & FORMATS**

Select - **New Route**

## How to Create a Route

On the main screen press

**MY ROUTE - CREATE A ROUTE**

If this is not highlighted press **CANCEL ROUTE** first  
then press the **+** button

You can now search for places using all the finding  
places options

You can now add as many Waypoints as you wish

When you have finished inputting your data press **GO**

You can now look at **ROUTE ALTERNATIVES**,  
**ITINERARY** or **SAVE ROUTE** by pressing the  
**MORE** button

## **How to Save a Route**

Once you have created a route, you can save it for future reference, here's how to do it

Go to **MY ROUTE - OVERVIEW - MORE**

Scroll down to **SAVE ROUTE**

You can now name the route of your choice and this will be stored after pressing **DONE**

To retrieve your route at a later stage

Go to **MY ROUTE - OVERVIEW - MORE**

Scroll down to **LOAD ROUTE**

Press **BACK** until you are at **SHOW MAP** and your route will be operating

## **Avoidances**

Should you wish to avoid a specific road along your journey or simply the road ahead

**MY ROUTE - AVOIDANCES**  
you now have an option to choose

**AVOID ROAD AHEAD** or **AVOID SPECIFIC ROAD**

The Navigator will re-calculate and you can accept or return to your original route

## **Speed cameras**

You can adjust the notifications on the speed cameras

Press **MORE - SOUNDS AND WARNINGS**

### **SPEED CAMERA & ALERT POINT SETTINGS**

If you untick the box this will **switch off all** notifications

If you select **ALERT TYPES**

this allows you to adjust separate camera alerts to visual, audible or disable

## **Advance Warning of Junctions & Exits**

You can adjust the notification given for junctions and exits by going to:

### **MORE - SETTINGS - SOUNDS AND WARNING**

#### **WARNING SIGN ALERTS**

By clicking on the individual options Lanes and Overtaking etc.

It allows to increase or decrease the distance for notification

## **Powering the Navigator**

Two power leads are included, a mains adapter and a cigarette lighter adapter that can be used on 12V or 24V vehicles.

Please note that you cannot charge your Navigator via the included USB cable, this is for connecting to a computer for updating maps, adding music etc.

**Only the included adapters should be used,** adapters and cables from other devices may not be able to provide enough power to run the device properly.

## **Turning the Navigator off**

To power the Navigator off first exit the Navigation app by using the power icon in the bottom left corner of the main screen. Now press the power button on the top of the Navigator for 2 seconds and select the shut icon on the screen.

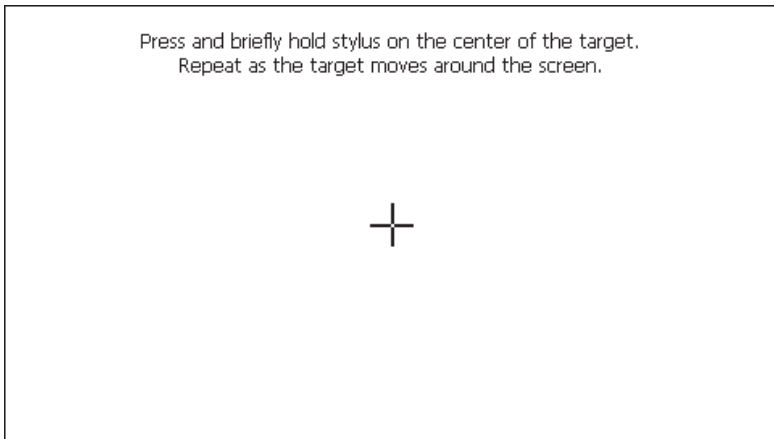

If you turn off your vehicle ignition or disconnect the Navigator while it is running you will get a warning that it is continuing on battery power.

If you are intending to be away from power for more than 30 minutes or you get low power warnings then you should turn the Navigator off as described above.

## **Screen Calibration**

If you ever find that touches on the screen are not registering precisely you can re-calibrate the screen by selecting the “Calibration” icon from the main menu.

When it asks if you are sure you wish to calibrate select Yes and you will then see the following screen:

Using the stylus\* carefully select the center of the cross and repeat as the cross moves from the center, to each corner of the screen in turn then click anywhere on the screen to return to the main menu.

\*The stylus is located in the rear of the sat nav (5" units) or on the back of the mounting plate (7" units)

## How do I change the Voice on the Navigator?

Press **MORE-SETTINGS-SOUNDS AND WARNINGS**

### **VOICE LANGUAGE**

### What next?

Now take a moment to watch the DVD included in the box to get to know your new Falcon Navigator.

You can also put the DVD in your computer to read the full user manuals.
